

## Code syncing script for autoscaling instances

sync\_files\_reboot.sh

#!/bin/bash

```
if ! pgrep -c nginx 1>/dev/null 2>/dev/null; then
    if ! pgrep -c rsync 1>/dev/null 2>/dev/null; then
        rsync --delete --owner --group -lave "ssh -i /root/.ssh/sync_file"
        root@172.31.24.213:/home/cloudpanel/htdocs/ /home/cloudpanel/htdocs/
        systemctl start nginx
        touch /tmp/init
    fi
else
    echo "nginx already running, do nothing";
fi
```

sync\_file.sh

#!/bin/bash

```
if ! pgrep -c rsync 1>/dev/null 2>/dev/null; then
    if [ -f /tmp/init ]; then
        rsync --delete --owner --group -lave "ssh -i /root/.ssh/sync_file"
        root@172.31.24.213:/home/cloudpanel/htdocs/ /home/cloudpanel/htdocs/
    else
        echo "file does not exist"
    fi
fi
```
